Abstract: In this paper to find out in India how technology is a saviour for the technological institutes. This is the high technology age, and it's necessary to every one to be computer literate. Because we find new innovations and impact of information communication technology (ICT) in the field of education. And it's true "Education and library are twin sisters. A woman" days we see that the growth of online learning and usage of e-services in higher education is increasing rapidly. Indian librarians faced the many problems to providing their services to users. The use of internet is a kind of activities increased in different.

Key Words: E- library, E- learning, Higher education

INTRODUCTION

We are living in the age of electronic information, where improvements in technology are reengineering the global information industry. Libraries are playing a very important role in infrastructure education and national information, which provide people with access and opportunities for participation in the digital age. In India and other countries are trying to follow informative literacy practices. E-learning given a new dimension to distance education in the world. Higher education is changing rapidly. The new knowledge resources based models are looking for information professionals who can quickly provide problem solving information indicating

useful new ideas. The new trend of packeted ecommunication technology has also impacted library learning in education including information science field. The user community also expected change their methodology.

Now a days digital resources are integral part of the library collections, and we know that easily available in remotely digital resources are easily also. Users access them from any where. The importance of open access resources and open educational materials has been realised as Librarians provided free and open access resources to the users in the form of digital guides the website via, this may boost the development

of institution repositories and their content in India.

The origin of e-learning not cont, suggested that the term most likely although it is originated during the 1980s. It has the ability to host a guest lecturer. The tea It can be .lectures without having to spent money done virtually with cameras for both lecturers and students. E- resources are spread online and in the forms other. This will happen due to the rapid information technologies advancement of it, including the internet and digitising techniques.

Technology has changed over the years the face of e- learning. In the last five years numerous structured, organisation, methodological changes occurred in university consequence of the European Higher teaching as a education Arena(EHEA)

In the modern era information technology digital resources have become readily accessible source of learning for teachers and learners in Open Education Resources(ORE). This type of encourage and enables sharing also movement is. Librarians are playing an important role in e-learning resources and services are very significant to research and technology in higher education. Concept of e-learning refers that with from any where the facility of internet any one can learn.Means we say that it's applicable in teaching and learning in the digital environment.

According to Leslie(1997) stated "libraries are organised collections of digital information. They combine the structuring and

information which librarians and gathering of archives have always done, with the digital representation that computers have made possible". Digital libraries are managed collection of information and the information is stored in digital forms. should be well informed on new inventions in ICT.

The librarians role significantly changed from a hybrid library to a completely virtual one.E-learning system also gained a competitive edge over the traditional methodology. The by the e- prevailing is being replaced-learning teaching system. Revolution of digital technology has a positive influence over the various day activities of human lives. Initially e-learning was implemented successfully in the developed countries. However technology can also controlling tool be co, empowering some users while excluding others.

Indian libraries and librarians faced infrastructural problems by and large. The demands for resources will increase in this changing scenario, the librarians role as a facilitator e even more magnified will become.

CONCLUSION:In the digital age librarians can no longer be simple information provider or the keepers of knowledge. With e-learning the having to ability to host a guest lecture without spend much money. students may not meet While faculty in person they do have the opportunity to interact with them whether it be by phone, by mail or by during on-line chat session.Globally,

teachers are taking efforts to improve the s to pedagogy by implementing effective method retain the classroom teaching and students attendance
